

As Trainee Structures Solutions Technology Engineer, you will benefit from the full Graduate Trainee Program offerings during your time at Vontobel.

You will...

- Rotate within the modules 'Financial Engineering', 'Market Making Systems', 'Portfolio Management Systems', 'Quant Group'
- Be part of the full front-to back experience when it comes to the generation trading, and risk management of financial markets instruments. This involves a manifold of state-of-the-art software concepts and solutions
- Have the chance to optionally obtain a Front Arena support certification or even attend a relevant conference such as Devops FUSION
- Start on October 1, 2021 and conclude the program September 30, 2023 (24 months)
- After the completion of your program, we can see you enter various openings, such as Trading System Engineer, Software Engineer (Structured Solutions), Data Engineer, Quantitative Analyst/Developer

Structured Solutions, with its numerous locations worldwide, provides its clients advice on financial investments. We focus on the engineering and distribution of these structured products. This contains the pricing, issuing, trading, market-making and the life cycle management.

Vontobel is one on the few places where you can participate in literally all steps in a highly professional work environment.

Vontobel has achieved a leading position as issuer of Structured Products in Europe and follows a strategic international growth initiative.

Your team is located close to our trading floor, at Bleicherweg 21, Zurich. You will be working within our Derivatives Infrastructure & Financial Engineering team and will be part of the Business Unit 'Structured Solutions'. You will participate in developing and operating the underlying technology platform globally.
